

Joe Langley

Mobile Number: 07980957037

Email: JLangley753@gmail.com

Date of birth: 29th April 1993

Address: 51, Woodland Gardens, Isleworth, Middlesex, London, TW7 6LW

I am a front end developer with a strong personal portfolio demonstrating a wide range of skills that I am keen to utilise and develop. I am quick to pick up new concepts and technologies as they arise, and I want to build upon the knowledge I have gained from my studies and years of work experience to thrive and progress in this industry.

Projects

My Website <https://joelangley.co.uk/>

A fast and clean site detailing all of my projects to date. It features full responsive design and taught me the process of getting a website live.

Noughts and Crosses <https://bit.ly/2EWACZZ>

A minimalist take on the classic 'paper-and-pencil' game, made using the React Javascript library.

Game Spinner App <https://bit.ly/2wZBwxj>

This collaborative React web application uses HTML, CSS and Javascript to help my friends and me choose our video game choice for the evening.

'Joe's Cafe' Website <https://bit.ly/2O8DNOK>

A responsive, mobile-first designed website for a fictional cafe. It uses HTML, CSS and Javascript to create a beautiful and interactive experience with an automatic photo slideshow and Google Maps API integration.

Key Skills

- *CSS3* and *HTML5*. I am able to effectively use both to create semantically correct, responsive web applications using mobile first principles. I also have experience using *Sass* and using the *Bootstrap* front end framework.
- *Javascript*. I can use vanilla Javascript (ES6), additionally I have used libraries like *jQuery* and *React*. I use *Node.js* to use the additional packages through *Node Package Manager* to enhance my projects, I recently utilised *Express.js* and *Socket.io* to create an application using the *MERN* software stack.
- *Git*. I use Git with my own projects for version control, progress tracking and time travel.

Work

2016 - Feb 2018

Ingleton Partners LLP Tax Associate

- I relished being given full responsibility and control over a number of large, wealthy clients with complex tax affairs. I completed their UK and US tax filings from the various financial documents and previous tax returns.
- It was important to keep well-organised and to balance my workload between clients, I did this by making detailed lists and keeping clear lines of communication between my fellow associates and manager.
- I demonstrated confidence and a natural ability to communicate when corresponding with clients, both over the phone and in face-to-face meetings.
- Tackled complex data analysis spreadsheets that analysed multiple accounts over several currencies and many years.

Education

2013 - 2016

University of Sussex

BSc (Hons) Mathematics (Second-class, lower division)

- I complimented my studies by being the founder and president of the Coffee Society as well as being the editor of the Commercial Awareness Society newsletter. These extracurricular activities were both a lot of fun and helped me broaden my horizons outside of mathematics.
- Using both MATLAB and SAS software packages gave me further tools to develop and use the mathematical concepts that I had studied.

2011 - 2013

Richmond upon Thames College

A-Levels: Mathematics (B), Economics (B), History (C)
